

WORKING ON THE CHAIN GANG

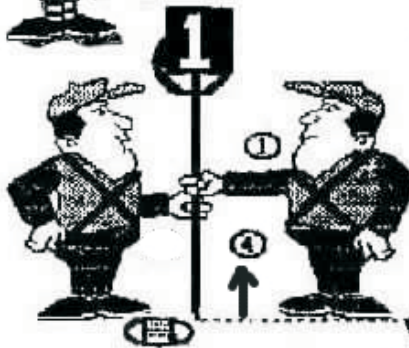

Safety

Your Safety always comes **FIRST!!!**
If Player/s are heading towards the sideline near you **DROP** the Chains or Box away from the play and get clear.

Setting The Chains (1st Down)

- 1: Set the Down Box and front stake where the Official tells you, this will be the front of the ball towards the Defense's goal.
- 2: Pull (smoothly) the rear stake until the chain is taught and not kinked.
- 3: Place the CLIP at the rear of the nearest continuous White Line and adjust the line No on it.

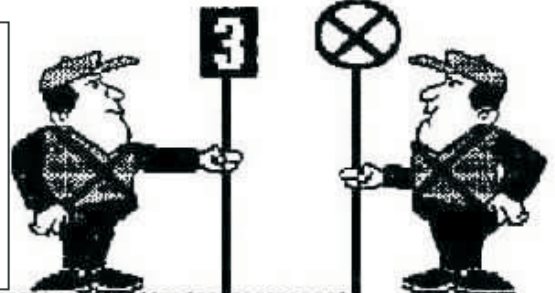

- 4: Move back 6' away from the sideline. Move the chains first aligning the Front Stake with the Down Box Then move the Down Box Back to Front Stake

Re -Siting the Down Box

NEVER move the down box until you are asked by your official. Move quickly to the spot indicated by your official and then change the down. If you see a flag check with the official as he may not have seen it!!!

BOX ONLY

When a first down is inside the 10 of the defense or on a PAT the official will only need the Down Box. The Chain Crew must lay down the chains and they can watch the play

1st and 3rd Quarter

At the end of the 1st and 3rd quarter the chains must be turned around if it is anything but a 1st down that finishes the quarter. Wait for your official who will help you move the chains.

*The Crew Thank You
for Your Help.
Have a Good Game!!*
